

THE COMPLETE SOLUTION FOR EYE SAFETY

Avatar Plus is a comprehensive family of protective eyewear designed to meet the safety needs of workers in Manufacturing, Construction, Utilities, Oil and Gas, amongst others.

Honeywell Avatar™ Plus

Honeywell

AVATAR™ PLUS EXTRA CLARITY ADDED PROTECTION

The key to keeping workers safe is to help prevent injuries in the first place. Building on that philosophy, Honeywell proudly presents Avatar Plus, a range of safety eyewear that combines modern style features, ease of use and the latest technology advancements. Committed to helping enhance worker safety, Avatar Plus is not just eyewear – it's a complete solution for eye safety.

ONE FAMILY, MANY APPLICATIONS

Honeywell takes pride in presenting Avatar Plus as a one-stop shop, offering a comprehensive family of safety eyewear.

Safety Spectacles

The safety spectacles are ideal for workers who need a fog-free layer of eye protection. Equipped with Hydroshield coating and a wide range of lenses (extension Q1 2025), the spectacles also cater for individuals with visual impairments, with available diopters ranging from +1.5 to +3.0 (extension Q1 2025).

Over-the-Glasses

With Over-the-Glasses (OTG) safety glasses, comfort, K&N coating, fit and style play a vital role in providing optimal protection and supporting compliance at the workplace.

Goggles

Featuring a modern design, Hydroshield coating and a lightweight construction, the Avatar Plus goggle helps provide protection, performance and comfort on the job.

A FAMILY WITH STYLE

An optimal balance of technology and design, Avatar Plus helps provide user protection and comfort without compromising on style. Combining current design features, high-quality materials and advanced technology, the family of protective eyewear benefits from an upgraded look and feel throughout.

The glasses deliver when it comes to worker acceptance and wearer usability thanks to a stylish design approach in line with today's trends. Highlighting the emphasis on style is the subtle green frame color that also serves as a visual indicator, making life easier for supervisors to ensure workers are compliant with safety protocols.

With a contoured shape that helps keep dust away, a sporty look and a comfortable feel, the family of eyewear is all about enhancing worker well-being and productivity.

A PLUS OF PROTECTION IN CHALLENGING WORKING ENVIRONMENTS

Recognizing the diverse needs of workers who wear safety eyewear for extended periods, we engineered Avatar Plus for functionality, comfort and user protection.

A clear benefit of the safety spectacles and goggles is the incorporation of Hydroshield anti-fog patented technology which helps ensure fog-free vision in diverse and challenging working conditions. This revolutionary coating is permanently bonded to the lens for long-lasting durability that won't wash off after extended wear or repeated washings.

Built to safeguard against dust, airborne particles and liquid splash or to help protect in case of impact, Avatar Plus is a commitment to the future of eye safety – made today. The single-family of products simplifies safety protocols, reinforcing the idea that safety is not just a requirement – it's a statement.

ALL-DAY COMFORT, ALL-AROUND FUNCTION

The better they feel wearing them, the greater the user efficiency. That is why worker comfort is at the heart of how we created our range of safety eyewear. The lightweight design coupled with ease of use and multiple personalization features make Avatar Plus a comfortable and highly functional choice of eye protection.

The safety spectacles' soft material of the nose bridge along with interchangeable lenses enhance functionality and ensure that workers feel confident and comfortable wearing their safety gear on the job. From Q1 2025 workers can choose from different replacement lenses in various tints and coatings that will be available for the Avatar Plus safety spectacles.

The range's OTG and safety spectacles feature a floating nose pad and flexible temple design that add in comfort while helping to reduce pressure on the wearer's face. Furthermore, the soft padding at the brow helps mitigate the severity of injuries in case of impact. In addition, the wrap-around, nine-base lens style of the safety spectacles enables uncompromised peripheral vision for complete visibility, increased awareness and peace of mind on the job.

DESIGNED FOR WORKER SAFETY AND COMFORT

From Over-the-Glasses (OTG) to goggles and safety spectacles, Avatar Plus caters to the needs of various industries, including:

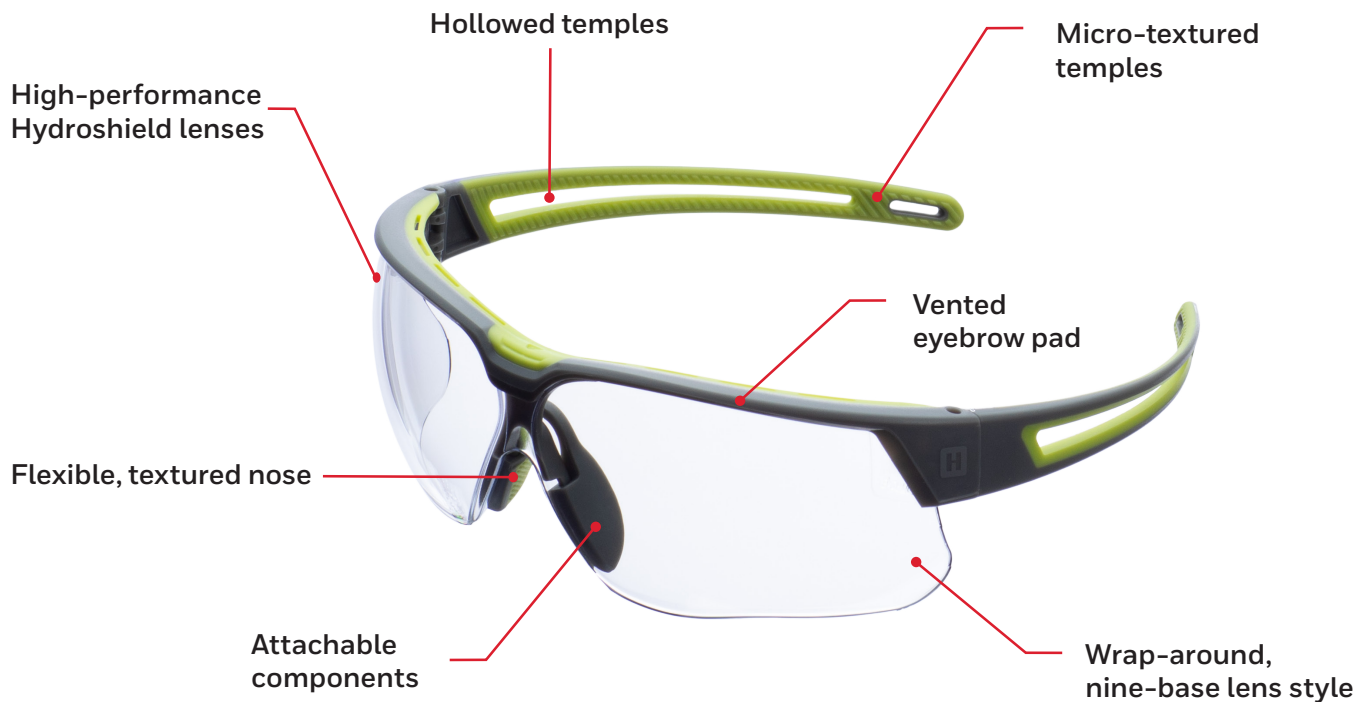

- Manufacturing
- Construction
- Utilities
- Oil and Gas

The seamless compatibility with other Honeywell personal protective equipment ensures a streamlined procurement process and helps provide protection against multiple hazards including:

- Dust
- Airborne particles
- Liquids
- Impact

ENGINEERED FOR EASE OF USE AND HIGH FUNCTIONALITY

HYDROSHIELD™ ANTI-FOG COATING

The dual action HydroShield anti-fog lens coating provides more than 20X longer lasting fog-free performance – even after extended wear and repeated cleanings – and provides greater scratch-resistance* than the current anti-fog coating.

- Permanently bonded to the lens
- Exceed 180 seconds of total fog free time
- No application
- No special maintenance beyond user manual instructions

* Comparative lens life test performed using a Bayer Abrasion Test method and may vary between environment and application
