

Up to 10-hours of cooling relief!

Key Features

HyperKewl™PLUS, Patented Evaporative Cooling Technology

- A lightweight, high-viz and durable approved accessory acclaimed by workers, particularly from the construction industry
- Reduce heat stress effects and increase the safety and productivity of the workers
- Provides up to 10 h of cooling relief
- Air temperature difference 6 to 12°C lower than outside temperature
- UPF 50+ (Ultraviolet Protection Factor)
- Standard 100 by OEKO-TEX® approved fabric
- Easy to activate and re-usable (up to 100 activations)

How it works?

- A water management system created from the HyperKewl™PLUS fabric absorbs & releases water within the multi-layered material
 1. Simply submerge the product in water for 1 minute allowing the HyperKewl™PLUS fabric to absorb the water
 2. Gently squeeze out the excess water, wipe dry and wear (B)
 3. Hook and loop easily attaches to textile headband straps of V-Gard helmet suspensions

- Before first use: follow activation proceeding above and let the product dry completely. This is necessary for the cooling fabric fibres to set into the product.
- For washing : soap and water (max 100 washes) or machine washable until 60°C (max 50 machine washes). No tumble drying.

Product range

Crown cooler

- Protect from dangerous heat
